

ArtWalk

RESIDENCES

ABOUT THE PROYECT

ArtWalk is more than just a residence — it's a lifestyle experience designed for a select group of individuals who are passionate about art and respectful of nature.

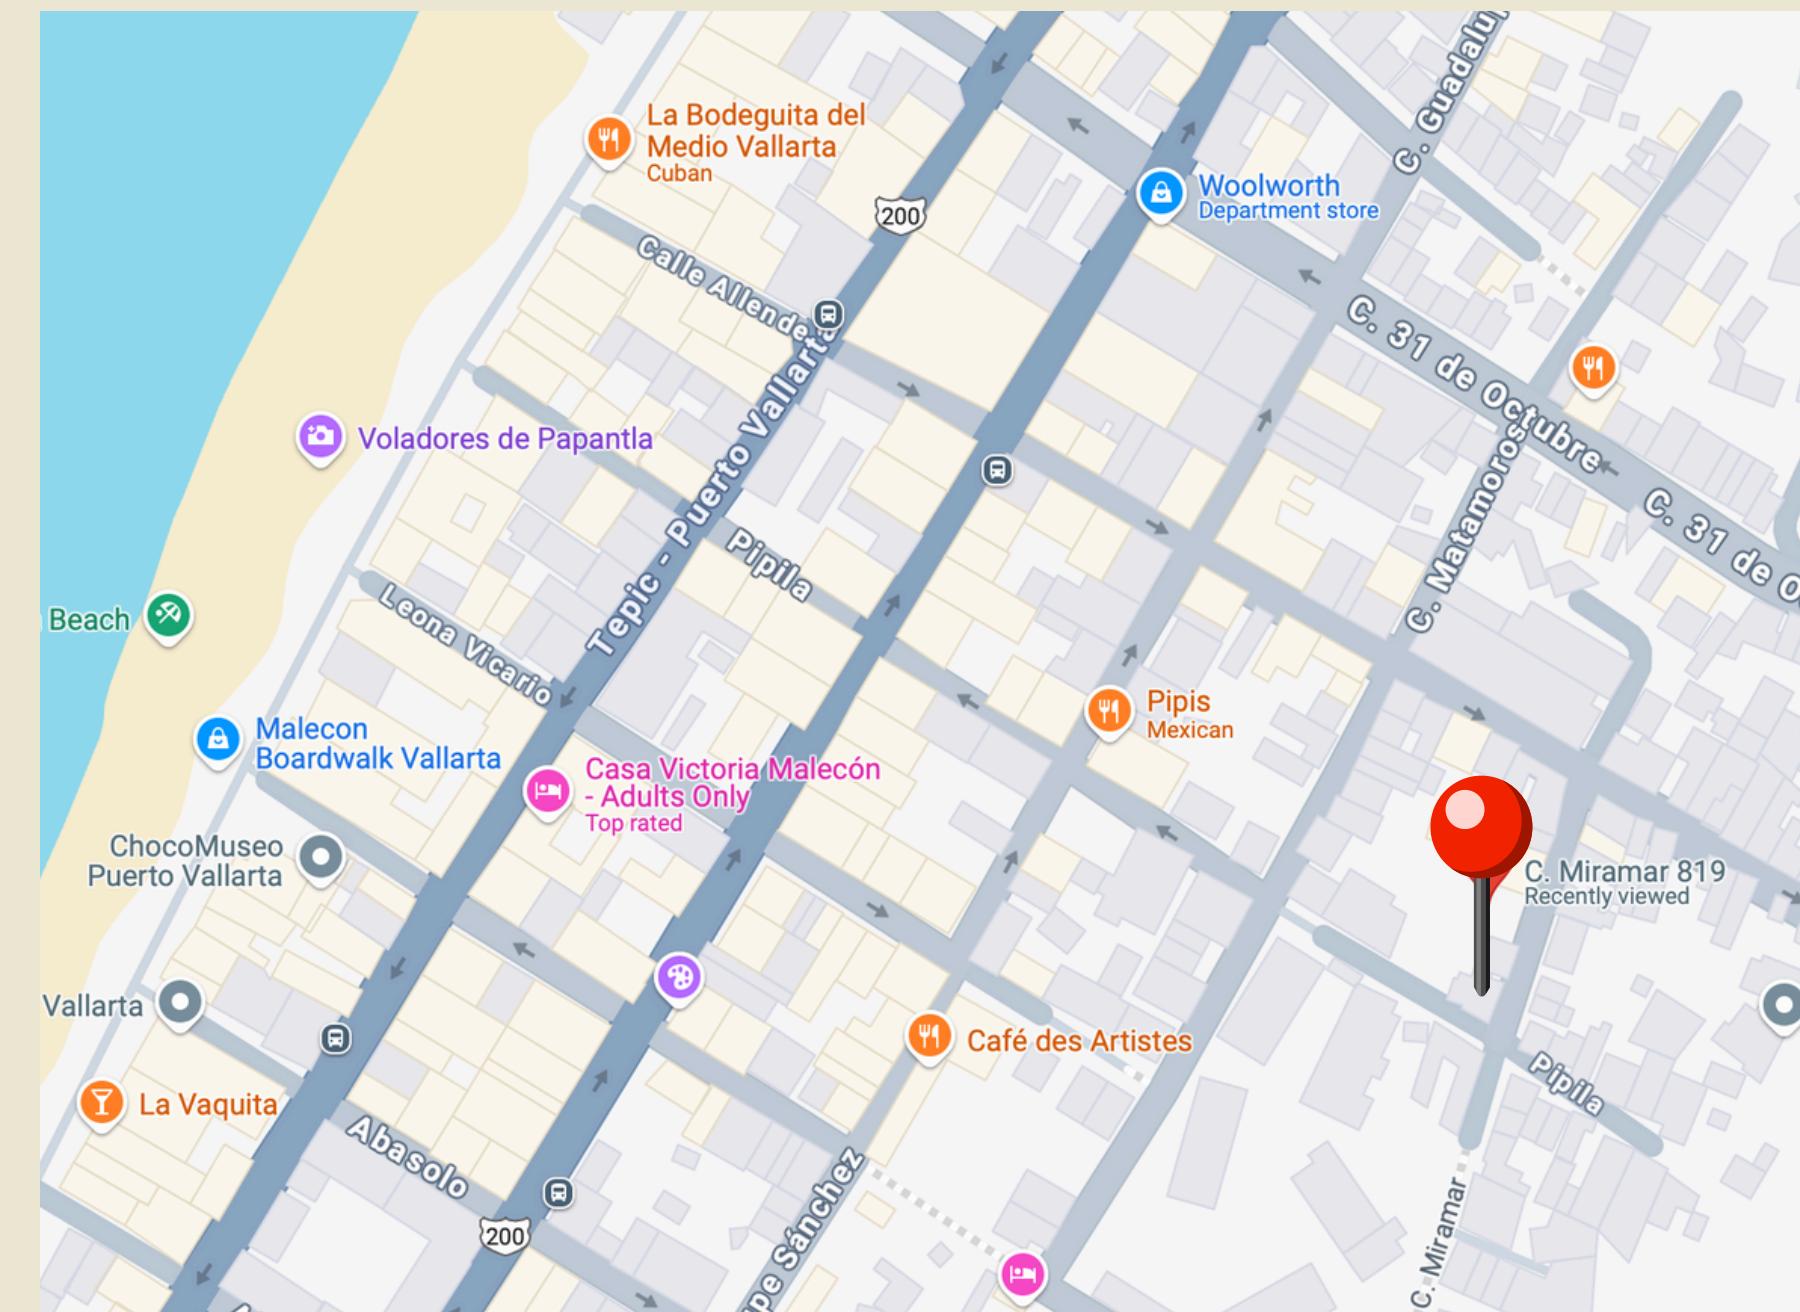

Rooted in Mexican artistic expression and inspired by the four elements of nature, ArtWalk is a tribute to Mother Earth. These natural elements are present throughout the entire complex, subtly shaping every space and inspiring a sense of harmony.

By integrating earth, water, fire, and air into its architecture, ArtWalk creates a balance that flows through the building and its community.

As part of the LEED® program, ArtWalk is committed to sustainability and the well-being of the environment and local community.

LOCATION

Puerto vallarta, Jalisco.
Miramar 805, downtown Puerto vallarta.

ArtWalk Residences is located in the heart of Puerto Vallarta's artistic district — a place full of culture and creative energy.

The project embraces the city's vibrant artistic community by embedding Mexican art into its core identity. Art isn't just decoration here; it defines the balance, shape, and essence of the project.

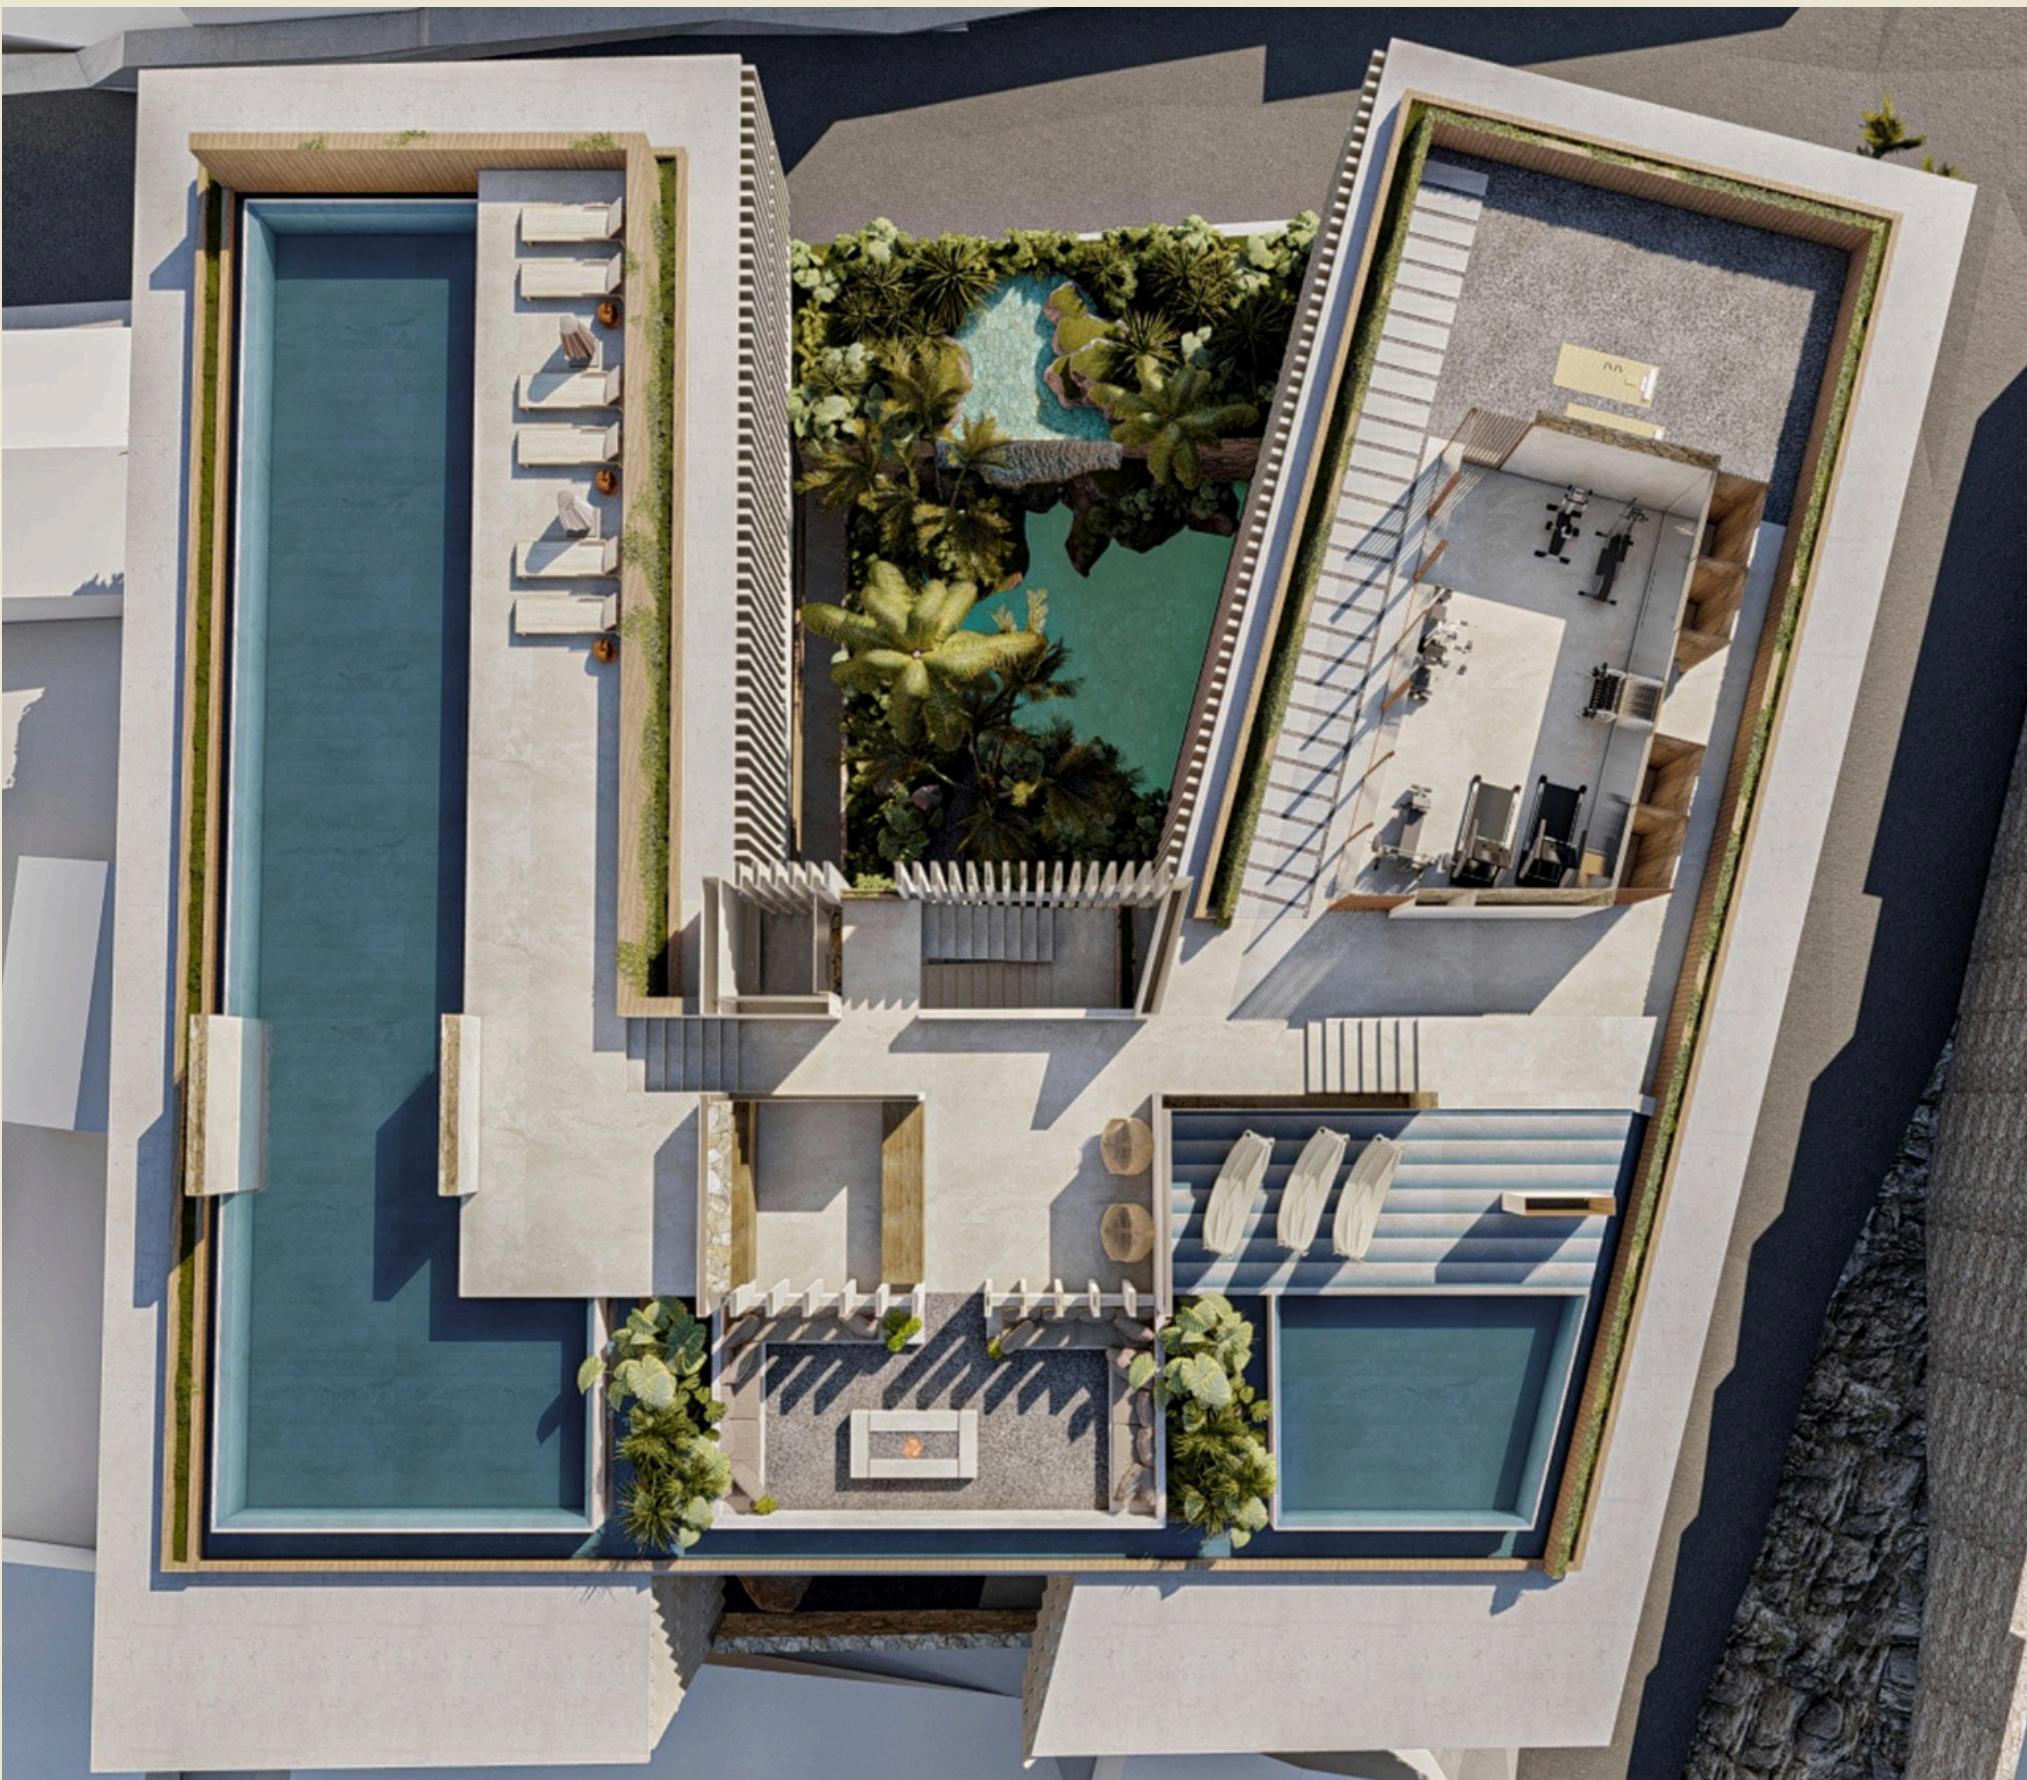

An underground art gallery enriches the community by offering a space for local and visiting artists to exhibit their work and connect with others.
